

## Accessories: Management Units

Agrilight® offers the total package, including Management units for the AL2007 fixtures. Designed to ensure optimum efficiency of the light installation in the barn, we offer the specially designed ALMU management units. The ALMU series is available in many versions:

	<b>250 Watt</b>	<b>400 Watt</b>
<i>ALMU Small</i>	1 - 12 pcs.	1 - 8 pcs.
<i>ALMU Medium</i>	13 - 24 pcs.	9 - 16 pcs.
<i>ALMU Large</i>	25 - 36 pcs.	17 - 24 pcs.
<i>ALMU Extra (Slave)</i>	Multiple of 36	Multiple of 24

- **OPTIMAL FUNCTION OF LIGHT INSTALLATION**
- **SIMPLY TO OPERATE**

With the ALMU series you are ensured of an efficient, optimum and easy operation of the lighting installation. The ALMU series offers many possibilities. With the integrated time clock, a lighting program of 16 hours of light and 8 hours of dark can be precisely set. With the ALMU Medium, the fixtures are split into 2 groups. By using one or two analogue shimmer switches, each group can be turned on or off individually allowing for greater control over desired light levels. The ALMU Large offers a digital shimmer switch, allowing you to very accurately set the light level.

# AGRILIGHT

*Bright by nature*

HID Lamps need 10 minutes to cool down after switching them off in order to bring the internal gas mixture back in balance. Our Management systems come equipped with a security feature ensuring the lamps do not restart after this 10 minute period, to guarantee the long lifetime of the bulb.

Using the Management unit contribute to a long life span of the installation and ensure switching without failures.

We would be pleased to design an optimal lighting plan for your barn. Please fill in a demand for lighting plan, which can be downloaded on our website, and we will show you all the possibilities for your barn.

For more information please contact your certified installer or Agrilight b.v.
